

Chicago Biomedical Consortium

11th Annual Symposium

Exploring Human Biology with Small Molecules

October 11, 2013

8:30 a.m. to 5:30 p.m.

The University of Chicago
Ida Noyes Hall
1212 East 59th Street
Chicago, Illinois 60637

SPEAKERS

Virginia W. Cornish

Columbia University

Expanding the Synthetic Capabilities of Yeast

Paul J. Hergenrother

University of Illinois at Urbana-Champaign

Natural Products as an Engine for Biological Discovery

Stephen J. Kron

The University of Chicago

Targeting Metabolism and Immortality in Cancer

Stuart L. Schreiber

Howard Hughes Medical Institute

Broad Institute of Harvard and MIT

Human Biology, Chemical Biology & The Science of Therapeutics

Kevan M. Shokat

Howard Hughes Medical Institute

University of California, San Francisco, University of California, Berkeley

New Chemical Approaches for Treating Neurodegeneration and Cancer: Activators of the PINK1 Kinase and Inhibitors of K-Ras

Richard B. Silverman

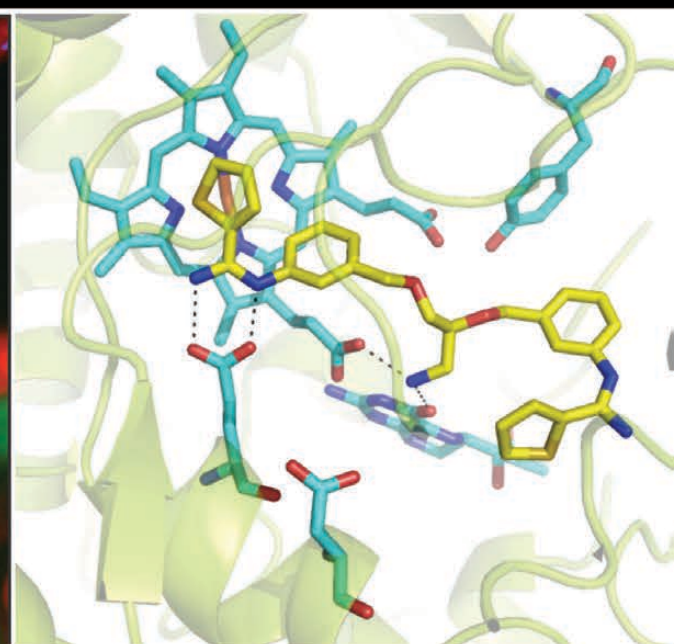

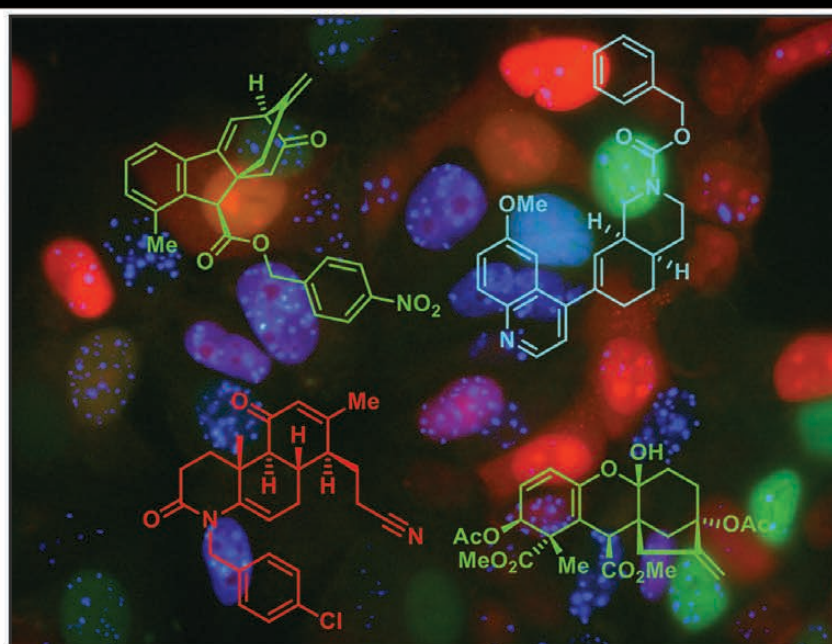

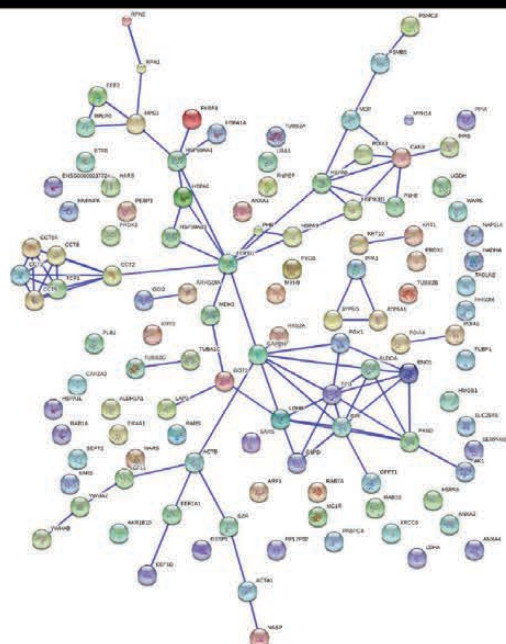

Northwestern University

Ca_v1.3-Selective L-Type Calcium Channel Antagonists to Slow the Progression of Parkinson's Disease

Gregory R. J. Thatcher

University of Illinois at Chicago

Beyond the Probe: From Protein Post-translational Modifications to Function

Registration and poster abstract submission deadline is noon, Friday, September 6, 2013.

For program and registration details, go to:

www.chicagobiomedicalconsortium.org

The CBC is supported by the Searle Funds at The Chicago Community Trust
